This Is Your Brain On Green Buildings

Dr. Edward Bernat
Associate Professor, Dept. of Psychology
&
Dr. Ming Hu
Assistant Professor, School of Architecture, Planning and Preservation

Monday, May 4 @ 4PM

Register

The University of Maryland’s Brain and Behavior Initiative (BBI) introduces a “TED”-style seminar series for scholars and non-experts alike. BBI’s QED Talks are meant to bring us together during this time when we are separated physically: a series of short, topically-diverse presentations followed by a Q&A, the QED Talks intend to educate through inquiry and endeavor to apply research about the brain and its behavioral outputs to your everyday life.
