Presents: Dr. Donald J. Bolger
The Brain & Dyslexia: The neurobiological origin of learning disabilities

October 11, 2017  7:00 - 8:30 PM

Donald J. Bolger is an Associate Professor in the Department of Human Development and Quantitative Methodology at the University of Maryland, College Park. Dr. Bolger’s research focuses on reading and language abilities and disabilities. His work includes neurobiological, cognitive, developmental and educational perspectives, and combines sophisticated research methodologies such as non-invasive brain imaging with behavioral and classroom-based studies.

In the Fed Commons of the Chelsea School Campus located at:
2970 Belcrest Center Dr., Suite 300
Hyattsville, MD 20782

Please join us for Part I in a series of public engagement events aimed at strengthening our community’s knowledge of learning disabilities. Speakers, along with Chelsea School staff, will be available for a brief question and answer session following each presentation.

Free & Open to the Public
