Ideas Worth Staying Home For

The Enduring Influence of Infant Temperament Across Development

Dr. Nathan Fox

Distinguished University Professor
Dept. of Human Development and Quantitative Methodology
University of Maryland, College Park

Monday, May 11 @ 4PM

[Register](#)

The University of Maryland's Brain and Behavior Initiative (BBI) introduces a "TED"-style seminar series for scholars and non-experts alike. BBI's QED Talks are meant to bring us together during this time when we are separated physically: a series of short, topically-diverse presentations followed by a Q&A, the QED Talks intend to educate through inquiry and endeavor to apply research about the brain and its behavioral outputs to your everyday life.
